onlinecklicker-bot

This is a small WPF/C# project to annoy our professor. Accidentally, he is the one who created OnlineClicker.org.

I like his lectures. You don't feel like a idiot listening to his stuff. It's entertaining and you can hear, that the likes what he does.

But: Sometimes it's funny to annoy people.

Disclaimer!

You are using this program at your own risk. Please be gentle and do not overuse it. After all, you are probably using OnlineClicker.org in a lecture!
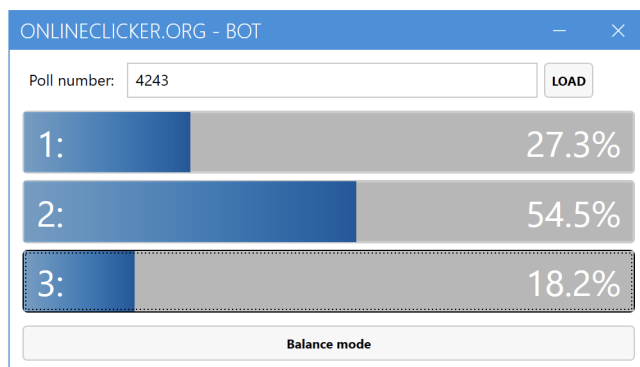

Using it

This is a WPF/C#/.NET solution. It's using .NET 6.2 and WPF. If you want to use it, you need to compile it yourself.

> *I will not provide a pre-build version! I want to prevent the overuse of this bot!*

Everything else is simple. Run it, enter a poll number and click some buttons.

You can add additional votes by clicking on one of the ProgressBars/answers.
